PROFILE

I'm currently studying computer science at the Faculty of Engineering, University of Porto. Alongside my studies, I'm working part-time at an engineering company, where I have the opportunity to apply and grow my skills as a software engineer. I'm always eager to learn and deeply passionate about what I do.

WORK EXPERIENCE

2023 - Present

Recruit @NIAEFEUP

Informatics Nucleus of Students'
Assosiation of University of Porto

Developer for the personal website (using SvelteKit and SpringBoot) and for the website "Time Table Scheduler" (using NextJS and Django),

2023 - Present

Software Manager and Developer

Norasil - Sociedade de Construção Civil, S.A.

Developer for the company's software, mostly focused in the website and internal applications. Responsible for the host and maintenance of the software. I also work in IT support, whenever necessary.

2020-2022

Startup CEO

Host and Code

When I was in highschool, I decided to create a startup. The focus was to host virtual private servers, websites and game servers. It gave me a lot of experience on how to manage networks, handle customers, website development, etc..

2017-022

Freelance

Friends and Family

Since I was little, I have been developing some freelance work in the most varied areas, where I was able to accumulate knowledge about web development, game development, computer networks, etc...

EDUCATION

LEIC - Bachelor's in Informatics and Computing Engineering

FEUP - Faculty of Engineering of University of Porto

2nd Year

High School - Sciences & Technology

CNSR - Colégio Nossa Senhora do Rosário

Average: 18.3/20.0
